EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Augustyn on March 26, 2004.

The application has been amended as follows:

Claim 1, line 14, after "gripping portion axis" add -said gripping portion axis is parallel to said longitudinal axis,-

The following is an examiner's statement of reasons for allowance:

Applicant amended claim 1 to include the limitation that the gripping portion axis and the distal portion axis are disposed at an angle with respect to each other. This limitation in combination with the examiner's amendment puts this case in condition for allowance. The prior art of Petner (USPN RE37415), Fernandez (USPN 6588045), Lewis (USPN 5724694) and Sartori (USPN 5381579) all teach a mop that has a wringer which passes over the cleaning portion. However all the references fail to teach that the gripping portion axis is angularly disposed with respect to the wringers distal portion axis. Lewis, Sartori and Fernandez teach that the gripping portion axis and distal portion axis are parallel and Petner fails to teach that the gripping portion axis is parallel to the longitudinal axis. For these reasons the applicant is free from the prior art.
